

Northern Defense Industries

Integrated security solutions for maritime, energy, and critical infrastructure applications

Northern Defense Industries, Inc. (NDI), an AMS Group company, is a leading provider of full spectrum integrated security solutions for critical infrastructure, maritime & coastal and transportation applications.

NDI specializes in the design, test, installation and logistics management of fully integrated air, land, sea and subsea security systems. NDI utilizes an open architecture and technology agnostic approach to ensure best value and optimized system performance for our customers. We provide fully integrated solutions comprising radar, sonar, electro-optic and other sensors with command-and-control systems, supported by intelligent integration and sensor fusion capability.

NDI Transportation Security Solutions

NDI provides a cost effective enterprise solution tailored to meet our customer's transportation security needs. NDI's expert staff is familiar with all applicable transportation regulatory bodies, such as the International Civil Aviation Organization (ICAO), International Maritime Organization (IMO) and Transportation Security Administration (TSA), and we can ensure that the complex security requirements and industry specific standards are met in all our deliverables. NDI routinely provides the following services and support to our customers.

Airport Assessments

NDI has a cadre of ICAO certified aviation security experts who can offer ICAO standard, US TSA standard or EU AS 300 standard inspections and surveys of the security posture of airports and the aviation sector. These assessments and surveys are tailored to meet the specific requirements of our customer and can cover all aspects of the aviation sector, from national laws and programs to tactical components such as perimeter security and screening operations.

Training

NDI offers a wide variety of aviation and transportation security training courses that are tailored to meet the customer's needs. These classes address a range of topics from screening and cargo operations to perimeter security procedures, as well as reviews of training programs and standards. NDI also provides unique training classes, e.g. behavior detection techniques and we can assist in establishing enhanced security training programs. All classes meet applicable international standards and are integrated with any existing national programs.

Subject Matter Experts

NDI's team of subject matter experts is led by John Halinski, the former Deputy Administrator/Deputy Assistant Secretary of the TSA. John also served as Chief Technical Security Advisor for the Department of State on aviation security matters and as the US Representative to the International Civil Aviation Organization for aviation security and a member of the AVSEC Panel. John is a retired Marine officer with 25 years of service in the intelligence and special operations field.

Crisis Incident Management

NDI can provide intensive crisis incident management training, table top exercises and real time exercises which meet ICAO standards and requirements. These training modules are all-inclusive and start with training for a specific event, then address each subsequent phase of a crisis incident and conclude with a detailed, written report which meets ICAO standards for national exercises and after-action reports. NDI also reviews technical aspects of crisis incident management centers and provides assessments to ensure the technology and procedures meet the customer's needs in the event of a crisis.

Technology

NDI is an integrator of technologically advanced sensor systems and specializes in all aspects of security solutions within the airport environment. NDI works with major aviation technology companies and can offer assessments, integration, training and evaluations of aviation technology to ensure it meets the customer's individual needs.

Surface Transportation Security

NDI can provide the customer with a wide variety of security offerings that include assessments and vulnerability studies, mitigation planning, training and education programs, evaluation of response systems and crisis incident management for centers and surface security programs.

Last Point of Departure Assistance

NDI personnel are recognized as subject matters experts in all aspects of security needs for flights to the United States and EU. We understand the requirements that all flights must meet in order to be accepted in to the U.S and EU. NDI personnel can provide assistance in the form of surveys, training, checklist preparation and other technical and specialized assistance to ensure aircraft and airlines meet these specific requirements.

Preclearance Assistance

NDI experts are recognized as the leading authority for countries seeking to develop preclearance sites for service to the United States. NDI personnel have worked with foreign governments to successfully obtain this status and can provide a variety of offerings to those customers who are seeking to meet these unique requirements.

Cargo/General Aviation

NDI provides a range of specialty security programs for the cargo and general aviation industry. We develop national cargo programs as well as specific cargo security practices. NDI offers the same level of security services for general aviation aircraft and programs.

Physical Security

NDI is a recognized leader in integrated physical security solutions. We provide a wide variety of services and technology offerings including radars, CCTV, communications systems, force protection training and systems enhancements as well as perimeter security and security system management.
